

## **Position: Product Specialist**

Sorrel Medical is a medical device company that develops and manufactures innovative medical devices. Specifically, Sorrel Medical develops cutting edge wearable drug delivery devices.

We are looking for a Product Specialist to join our team; supporting our development projects and customer-facing activities.

### **Job Description:**

- The Product Specialist will act as a coordinator and supervisor in the customer-facing development programs of our wearable drug delivery platform
- Working to define new products with our customers, researching the market, defining user needs and product requirements
- A liaison between project staff and the customer project team; building internal infrastructure to enable efficient cross-collaboration
- Working across large international pharmaceutical companies, both in the EU and the US, with multidisciplinary teams, driving coordination to ensure that all required deliverables are completed and provided to the customer on-time

**Direct Manager:** Director of Product

### **Job Requirements:**

- **Education:** Bachelor's degree in engineering or life sciences
- **Experience:**
  - 1-3 years demonstrated experience in international customer facing positions, including project/product/program/account management
  - Experience in a medical device/pharmaceutical company - major advantage
- **Language Skills:**
  - English: Fluent and flawless (ability to present, speak and correspond with ease, as this will be the primary language of your daily work)
  - Hebrew: Professional proficiency (ability to work with Israeli coworkers)
- **Computer Skills:** Full control of MS Office applications - must
- **Additional Skills:**
  - Customer and service oriented; confident, polite and respectful
  - Strong written, verbal communication and interpersonal skills
  - Tech savvy; ability to have a thorough technical understanding of the development project of an electro-mechanical medical device
  - Good organizational and planning skills
  - Team player, positive and upbeat; able to integrate into a young, vibrant and innovative medical device company
