

Position: Project Manager

Sorrel Medical is an international medical device company that develops and manufactures innovative medical equipment. Specifically, we develop wearable drug delivery devices. We are looking for a strong skilled and talented project manager to join our team.

Job Description:

- Lead a cross functional project team including R&D, QA, RA, Operations, and other core team members driving to successful and optimal delivery of project objectives
- Lead the project through all stages of the project design and development lifecycle from initiation through launch
- Coordinate and drive execution of highly skilled and professional matrixed, multidisciplinary teams
- Skilled at interfacing with customers and ensuring customer satisfaction
- Responsible for management of the project deliverables throughout the project lifecycle including writing product requirements and ensuring traceability from design inputs through design outputs
- Create project plans; analyze and document project objectives, deliverables, schedules, assumptions, constraints, and dependencies
- Identify potential project risks and develop action plans and mitigations

Direct Manager: Sr. Program Manager

Job Requirements:

- **Education:** Bachelor's degree in Bio-Medical Engineering, Mechanical Engineering, or other related engineering discipline
- **Job skills:**
 - Minimum of 3-5 years' experience managing development projects in the medical device industry with prior experience working as an engineer in R&D
 - Knowledge of project management practices
 - Demonstrated ability to effectively manage projects and meet deadlines
 - Experience interfacing with customers and senior leadership
