

Position: V&V Engineer

Sorrel Medical is an international medical device company that develops and manufactures innovative medical equipment. Specifically, we develop wearable drug delivery devices. Developing innovative medical devices requires a strong and skilled verification and validation (V&V) department to test and approve the devices, as part of a development project.

Job Description:

- Lead verification and validation efforts for new products and components
- Responsible for designing and implementing experiments for various projects (both for research and V&V)
- Responsible for defining tests and writing V&V protocols
- Performing V&V tests and write the reports
- Take an active role in development project as the V&V representative
- Leading V&V test plans

Direct Manager: V&V Manager

Job Requirements:

- **Education:** BSc - Biomedical/ Electrical/ Mechanical Engineering/Life Science
- **Job skills:**
 - Experience of 3-5 years in medical device or pharma industry – advantage
 - Experience with testing HW, SW and mechanical sub-systems
 - Proven analytical, problem-solving and troubleshooting skills
 - Prior work in a regulated environment, following development standards and processes – advantage
- **Computer skills:**
 - Full control of all MS-Office applications
- **Language skills:** Fluent English – written and spoken.
- **Personality:**
 - Motivated, creative, meticulous, analytical mind, expressive, friendly, and excellent organizational skills
