

PhD/MSc student positions

The Weih's lab (<https://weih's.net.technion.ac.il/>), Faculty of Biomedical Engineering, Technion, is seeking excellent graduate students for the exciting clinical translation stages of the development of our innovative, rapid (~2hr), technology for early prediction of metastatic risk in cancer.

Exciting projects available in

- Experimental testing of cell lines and fresh tumor samples
- Microfluidics design and experiments with cancer cells
- Advanced image processing
- Machine learning
- Finite element modeling

Excellent candidates with a biomedical engineering, or relevant engineering background are invited to contact **A/Professor Daphne Weih's** (daphnew@technion.ac.il), for more information.
