

## **Medical Researcher**

At Diagnostic Robotics, we imagine a world where clinicians, consumers, and payers have access to all the information they need to make smarter, more cost-effective decisions about patient care. Our intuitive, user-friendly diagnostic solutions leverage artificial intelligence and predictive analytics models to make this world a reality.

We are looking for a Medical Researcher Manager with a medical background to join our research team and lead the medical aspect of our products.

As a Medical Researcher you will:

- Join our research team and work closely with Data Scientists, ML, and SW Engineers
- Responsible for defining and managing medical protocols
- Leading the clinical research goals and execution
- Analyze expert opinion and incorporate it into project roadmap
- Involved in high level clinical discussion and be able to properly represent the medical issues in product discussion

Requirements:

- Doctor of Medicine (MD) - required
- Post-residency - an advantage
- An engineering background would be a great plus
- Analytical (data-driven) and methodological approach
- Extensive medical, scientific and clinical research knowledge
- Ability to commit for at least one year of  $\geq 60\%$  or full time job.
- Proven research experience: Publications / PHD- an advantage
