

Position: Clinical Research and Regulatory Assistant

Clinical Strategic Consulting (CSC) provides regulatory and clinical strategic planning and product development services for medical devices such as Software (AI) Incorporated Devices, In Vitro Diagnostics and Combined Drug or Biologics devices. The company is consulting to companies at the cutting-edge medical technologies. If you are looking to develop and understand the medical regulatory environment this is the job for you.

The office is located in Giv'at Ada-Binyamina.

Job Description:

We are looking for a Biomedical Engineering student/graduate for a part-time job (twice a week, morning to noon, at the office) as a research assistant for performing literature reviews and preparing submissions to regulatory authorities (FDA, CE) for medical devices. The position percentage will increase after three months on the job.

Requirements:

- Biomedical engineering student (4th year) or graduate
- Ability to manage several simultaneous processes
- Task-oriented
- Attention to details
- Self-taught
- Fast learner
- Native or fluent English speaker (high-level scientific writing is a must!)
- Experience in regulation – an advantage
