

The Satchi-Fainaro Lab for Cancer Research and Nanomedicine is seeking a highly motivated **Postdoctoral Fellows in Polymer Chemistry and Engineering**

For exciting and challenging projects focused on:

- Design and synthesis of novel nanomedicines for cancer
- Novel polymeric hydrogels for 3D bioprinting

Application Requirements:

- Ph.D. degree in Chemistry, Materials Science and Engineering or related fields
- Must have previous experience in organic synthesis
- Background in polymers, 3D printing, and/or material engineering – advantage

To apply, please send your CV, cover letter and name/contact information of two references to: lab.rsf@gmail.com

For more information on our lab, please visit our website: SatchiFainaroLab.com
