

V&V Tech Leaders and Engineers open positions

Lumenis Surgical platform was recently purchased by Boston Scientific a billion dollar company with 36,000 employees world wide.

At this platform, we develop cutting edge laser technology for lithotripsy and enucleation of the prostate.

We have several complicated, interesting and challenging projects that will affect patients' lives when being operated.

As a part of the R&D process, Verification and Validation activities are held to prove safety and efficacy of the developed systems.

In our V&V team – we lead this activity – starting day 1, we define the needs, strategy, test procedures and execute the tests to be as excellent as we desire.
We are looking for V&V engineers to join me team and lead the V&V activities for projects for full time position.

You have to be a people person, we interact with all aspect of the product
You have to love challenges and be able to learn fast and think right
You have to be methodic with technical abilities, flexible, enabler and accurate.
You will define and execute the test protocols, reflecting findings to the entire team, bringing the product to perfection.
Previous experience is an advantage.

We offer optimal environment supporting your needs to develop and grow with us. It won't be easy but it will be worth it.

Send your CV (or contact for questions) to avivb@lumenis.com
