

Rapid Medical is a fast-growing medical device company focused on developing, manufacturing, and selling innovative devices for endovascular interventional procedures. The company is based in Yokneam, Israel, and our current commercial portfolio includes devices for treatment of ischemic stroke, intracranial saccular aneurysms, and endovascular navigation tools.

R&D Internship Program

The *R&D Interns* will join our R&D and Engineering team for a period of approximately **3 months**, where they will be mentored by and collaborate with R&D engineers to support product development projects in various phases from concept to commercialization. Work scope may include some of the following:

- Prototype testing
- Design of jigs and fixtures
- Generate test protocols and reports
- Generate DMR (drawings, routing cards, work instructions, material specifications)
- Perform verification and validation testing (V&V)
- Support transfer to production activities
- Small batch production

The candidate should have a mechanical, biomedical or materials engineering background, highly motivated, sharp and enthusiastic about medical device R&D, good hands and understanding of mechanics, and endless hunger to evolve and learn.

The candidates accepted to the program will gain practical real-world experience and a valuable footprint in the medical device industry.

Exceptional Interns may be given with an opportunity for a full-time position, in accordance with the company's consideration.

Internship period: 20 March 2022 - 30 June 2022

Minimum requirements for applying to the program:

- Students with 1-2 semesters left to graduation, that can commit to a minimum 40% position during the internship period.
or:
- Mechanical, biomedical or materials engineering graduate from a university/Technion that can commit to 40%-100% position during the internship period.

Additional requirements:

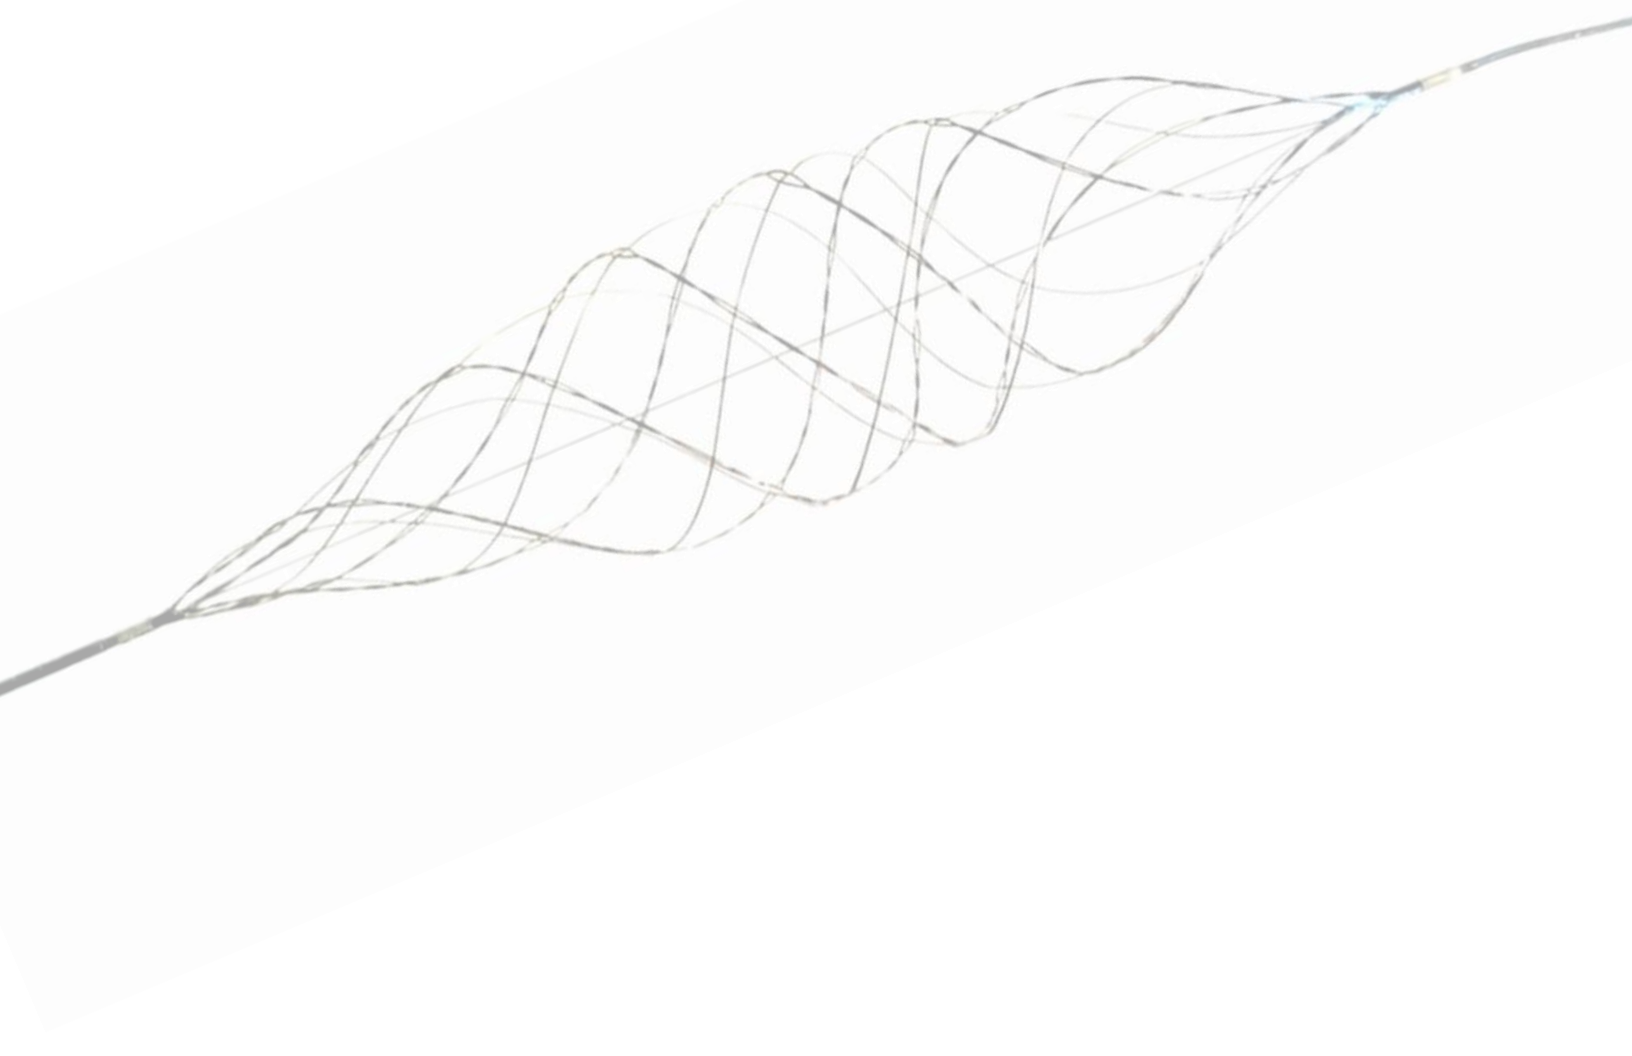

- Responsible, independent, and highly committed
- Organized & methodical
- Team player

- Fast learner
- Good hands (testing, assemblies)
- English – high level
- Familiar with Solidworks – an advantage

Why Rapid Medical?

The right candidate will have the opportunity to enter the medical device industry and join a company that is on a success path with a solid financial back and a portfolio of commercial products. We have already several years of market presence gaining commercial and clinical experience, but we are still agile and fast with a start-up DNA. We have the know-how and proven ability to develop and commercialize new products and technologies which are innovative and unique, and we are growing rapidly in the exciting field of neuro-intervention and endovascular intervention procedures and offer the R&D Intern a professionally challenging work and a full cycle experience of life-saving class III devices development → regulation → production → commercialization. If you want to see your work saving lives in the hands of physicians and work with great people – come and join us!

Send your CV to danielle.elbaz@rapid-medical.com
