

Senior Clinical Research Specialist

- We are looking for a Senior Clinical Research Specialist to join the company that develops visualization solutions that bring natural stereoscopic sight to minimally invasive surgery!
- In this exciting role as a Senior Clinical Research Specialist (CRS) you will have primary responsibility in driving medical device innovation and successful clinical study execution through product development oversight, clinical affairs strategy assessment and process improvement. You will participate in the development of the Global Clinical Strategy for a class of trade within the Surgical Innovations portfolio and ensure that specific clinical plans and study protocols are consistent with the strategy.

Location: Petah Tikvah, Israel.

- **Requirements:**
- Bachelor's degree required with a minimum of 4 years of clinical research experience or advanced degree with a minimum of 2 years of clinical research experience
- Fluency in written and spoken English
