V&V junior engineer

Check-Cap is a clinical-stage medical diagnostics company developing C-Scan[®], the first capsule-based system for preparation-free, colorectal cancer screening.

C-Scan[®] is Designed to improve the patient experience and increase the willingness of individuals to participate in recommended colorectal cancer screening, it removes many frequently-cited barriers, such as laxative bowel preparation, invasiveness, and sedation.

If you are passionate for new technologies in medical devices which will influence millions throughout the world, we are offering a unique and great opportunity for talented people, to help us build and ensure our products meets the highest standards.

We are looking for a passionate R&D teammate for our V&V team, who is willing to step-in one of the most breakthrough start-ups.

Qualified candidates must meet the following requirements:

- B.Sc. in Bio-Medical Engineering or similar
- Must have outstanding written and verbal communications skills in English;
- Familiarity with Electrical Engineering tools (Oscilloscope, Signal generator, DVM, etc.) – advantage;
- Mechanical technical skills, hands-on approach;
- Test design & execution knowledge – preferred;
- Understanding of multi-disciplinary systems, preferably in medical devices (SW, HW, Mechanics, Physics) – advantage;
- Must have outstanding interpersonal relations and team working capabilities.
