

Job Description:

TruLeaf Medical, a startup company based in Or Akiva, is looking for a full-time Cardiac Implants Product Engineer to join our R&D team. The position requires a strong technical background and hands-on experience in medical device design and development.

Key Responsibilities:

- Design and development of cardiac implant devices
- Development and execution of test protocols to evaluate device performance and safety
- Collaboration with cross-functional teams to ensure timely product development and launch
- Maintenance of technical documentation and regulatory compliance

Required Qualifications:

- Bachelor's degree in Mechanical Engineering, Biomedical Engineering, or a related field
- Strong understanding of materials science, mechanics
- Proficiency in CAD software (SolidWorks, AutoCAD)
- Basic knowledge of regulatory standards (ISO 13485, FDA QSR)

Preferred Qualifications:

- Experience with medical device manufacturing processes
- Good verbal and written skills in English
