

Open positions

Medical AI & MRI Lab

MSc/PhD students, postdocs

Undergraduate projects for excelling students

Our research involves:

- Developing computer vision & deep learning algorithms for medical imaging
- Optimizing sampling methods
- Developing theory for inverse problems
- Designing & running MRI scans
- 3D printing

Requirements: strong background in signal & image processing, machine/deep learning, physics, Python

Dr. Efrat Shimron

European Research Council

Technion's MRI center
